## Upper Columbia River Residential Soils Study: Soil Data, Lead and Arsenic Samples

(b) (6) 20 Feet Incremental composite soil samples: Soil taken from 30 locations in each **Property Owner:** decision unit (DU) were mixed together (b) (6) to make a single sample. (b) (6) Parcel(s): (b) (6) **DU 203** Property Boundary 897 ppm of lead 29 ppm of arsenic Recommend following **Incremental Composite** Soil Safety Guidelines **Sample Concentrations** (b) (6) Less than 250 ppm of lead and less than 20 ppm of arsenic. No action required. (b) (6) Greater than 250 ppm of lead and/or **DU 204** greater than 20 119 ppm of lead ppm of arsenic. 3 ppm of arsenic Recommend using the Soil Safety No action required Guidelines (b)(6)described in the brochure included with this map. Discrete Soil Sample Concentrations Samples collected from 1 inch below surface down to about 6 inches deep.
